

BlendStone - stone veneered

With BlendStone you have the possibility to use stone as a front and create unique accents. A very thin stone layer of 4 mm is permanently bonded to the aluminium substrate. The hybrid stone is mitred at the edges so that the impression of solid stone is created. This makes it possible to realize constructions that would be impossible with solid stone for weight reasons.

- thickness Blendstone20 approx. 20 mm
- thickness BlendstoneSlim approx.
- available in almost all natural stone materials
- weight aprox. 18.5 kg/m² or 15.5 kg/m²
- front with affixed stone plate
- back-side synthetic resin
- the material can be easily removed with carbid-tipped tools
- visible edges processed in mitred stone
- back-side is undrilled
- max. mass: 2400 x 650 mm
- lead time: approx. 6 weeks
